Install WooCommerce

How to install WooCommerce

To do an automatic install of WooCommerce log in to your WordPress admin panel and go to: Plugins > Add New.

In the search field type “WooCommerce” and click Search Plugins. Once you’ve found the plugin you can view details about it such as the point release, rating and description. Most importantly of course, you can install it by simply clicking Install Now. After clicking that link you will be asked if you’re sure you want to install the plugin. Click “yes” and WordPress will automatically complete the installation.

More Info at: <http://docs.woothemes.com/document/installation/>

The screenshot shows the WordPress 'Install Plugins' interface. On the left is a dark sidebar menu with options: Dashboard, Sites, Users, Themes (4), Plugins (2), Installed Plugins, Add New, Editor, Settings, Updates (6), and Collapse menu. The 'Plugins' menu item is highlighted in blue. The main content area is titled 'Install Plugins' and includes navigation links: Search, Upload, Featured, Popular, Newest, and Favorites. Below these links is a text block explaining that plugins extend WordPress functionality and providing a link to upload a plugin. A search bar contains the text 'woocommerce', and the search button is circled in red with a '1' next to it. Below the search bar is a section for 'Popular tags' with the text 'You may also browse based on the most popular tags in the Plugin Directory:'. This section contains a grid of blue underlined tags including admin, AJAX, buddypress, category, comment, comments, content, email, Facel, image, images, javascript, jquery, link, links, login, media, page, pages, pho, posts, rss, seo, shortcode, sidebar, social, spam, stats, twitter, video, and Wi.
